

Winter Ice Suncatcher

Materials:

- Pie tin
- Twine
- Natural materials
- Water
- Freezer

Grab your coat and collect leaves, berries and any other winter nature treasures you like. Arrange the materials in the pie tin and cover with water. Loop a piece of twine or rope and submerge half in the water and half outside. Carefully place the tin in the freezer for 24 hours. Once frozen, remove your ice sun catcher from the tin and hang outside in a tree or bush.
